A stream-based point-processing application developed at the VMML needs a web frontend. Design a website and interface it with our C++ application.

**REQUIREMENTS**
Knowledge in current web standards and technologies.

**WORK LOAD**
100% Implementation

**PROJECT TYPES**
This project can be done as either Bachelor thesis, as an internship (Praktikum) or as SIROP-Project. Goals can be adjusted depending on project type.

**SUPERVISION**  Prof. Renato Pajarola, Jonas Bösch (Assistant)
