

Tameus
Project meeting
June 8, 2012, 10:00 - 17:00
Minutes

Participants: Böhlen, Bracher, Cafagna, Taliun

Agenda

- 10:00 - 11:30 discuss the the recent activities including data import, collaboration with laboratories and annual report.
- 11:30 - 13:00 Cafagna meeting with Bracher about computation of derived nutritive measurements.
- 13:00 - 14:00 Lunch.
- 14:00 - 15:00 Bracher and Taliun discuss the data import.
- 15:00 - 16:00 Bracher, Leimer and Taliun and discuss statistical region comparison.
- 16:00 - 17:00 Bracher and Taliun work on presentation for iEMSS 2012.

Workshop of Agroscope with labs (data providers)

- Annelies presented prototype; positive feedback about possibilities with map; single sample can be tracked by experts through partial LIMS Nr (hide LIMS number in the future; make it available to admins)
- one lab has not committed to provide data in the future; unclear what will happen; for labs this is competition (less need to make their own expensive analyses; some are happy some are not)
- need different levels of permission (public, paying, admin)
- need disclaimer for web page
- TODO: Annelies prepares document that describes the different permissions that we need; best to have a matrix that defines who gets which permission; permission can later be changed

Data import

- it is important to work on the data and upload data
- there are still some problems (Excel format)
- TODO: Annelies does data imports as soon as possible and fixes problems with Andrej; must happen well ahead of our next meeting

iEMSS presentation

- Annelies attends a conference MO-WE next week
- TODO: Andrej and Annelies prepare iEMSS talk and send around presentation

SNF reporting

- August/September we will have to hand in 1 year progress and financial report to SNF
- TODO: Michael gets information about what must be done
