

Tameus
Project meeting
July 27, 2012, 10:00 - 17:00
Minutes

Participants: Bracher, Cafagna, Taliun

Agenda

- 10:00 - 11:00 Betschart, Leimer, Bracher and Taliun discuss visualization of the spatial nutritive content with the color plots and statistical regions comparison.
- 11:00 - 13:00 Cafagna and Bracher discuss derived nutritive measurements.
- 13:00 - 14:00 Lunch.
- 14:00 - 16:00 Bracher and Taliun discuss the data import and Beta version of the web application.

Student Projects

- it is necessary to improve the color plots with the visualization of the color palette and the manual choice of the nutrients; in the future the colors must be fixed for the values of the same nutrient.
- there is a mistake in computation of the T-Test while comparing the regions.
- TODO: Annelies provide application examples for the color plots and regions comparison.

Web Application and Data Import

- the data import application works without error; the key data is successfully imported.
- the new version of the web application is sufficiently fast for the public use.
- TODO: disclaimer, collection of the user feedback, meaningful textual information in the web application, protection from the copying the data.
