

Internship, Machine Translation

Zurich, Switzerland | 80 - 100% | 3 - 6 Months

TextShuttle creates Natural Language Processing (NLP) technology with a focus on domain adaptation and data privacy. We are a fast-growing company with ambitious goals, headquartered in Zurich, Switzerland.

We are looking for motivated Interns to join our team, helping to extend and scale up our Machine Translation services.

Responsibilities

- Contribute at all levels of our Machine Translation stack
- Work in close collaboration with our systems specialists
- Gain insights through research, A/B tests, and rapid prototyping

Your Qualifications

- Currently enrolled in a Bachelor's or Master's programme in Computational Linguistics, Computer Science, or a related discipline
- Programming experience with Python 3
- Basic understanding of Machine Learning concepts and techniques
- Fluency in English and/or German
- Citizen of Switzerland or any EU/EFTA state, or a valid working permit for Switzerland

Bonus Points for

- Experience with Docker, Docker Swarm, and/or Kubernetes
- Experience writing and utilizing RESTful API services
- Fluency in a language other than English and German, especially French or Italian

Benefits

- Work on real-world problems with cutting-edge NLP technologies
- Expand your knowledge of Machine Learning and Machine Translation in particular
- Compensation of CHF 3,500.00 per month (gross)
- Possibility to continue working part-time after internship
- Relaxed working conditions with a small and fun team
- Regular team activities, including hackathons abroad
